Projects

Web App

LOVE TO DEVELOP FRONT IN REACTJS AND BACKEND WITH NODEJS AND EXPRESSJS WITH MONGODB AND ALSO BACKEND SPRINGBOOT WITH MYSQL DATABASE.

1. Portfolio website (MERN stack)
   - DEMO: https://mujtaba-ali.vercel.app/
2. Memories A post (MERN stack)
   - DEMO: https://eloquent-beignet-f03ed6.netlify.app/
3. POS CRUD(ReactJS with SpringBoot)
   - DEMO: https://pos-mujtaba4li.vercel.app/
4. Admin Dashboard (ReactJS)
   - DEMO: https://admin-dashboard-fyp.vercel.app/dashboard
5. E-commerce (Wordpress)
   - DEMO: http://jadidcreation.com/

Mobile App

It's amazing to develop Mobile applications and if they are cross-platform (Android & IOS) then It's wow. I love to develop with React Native and want to explore more about Mobile apps.

1. Pak Deliveroo Mobile app (React Native))
   - DEMO: https://vimeo.com/756063945
   - Git repository: https://github.com/Mujtaba4li/Pak-Deliveroo-React-Native

IOT project

Semester Project

I created the Smart Parking System as a semester project with Arduino UNO and with IR sensors to detect the object and then they pass the signal to Arduino then It displays a message on LCD that the car is parked on the slot (1,2,3....) and also LCD displays message where the slot is available where the slot is unavailable. If parking is full the barrier will not open and show the message on the LCD parking is full.

- Demo: https://vimeo.com/740587964

Desktop Application

Semester Project

I created the Grocery Store Management System desktop application as a semester project. In which login base where admin and cashier login is to be used and they act accordingly. Admin can perform full CRUD operation. He can add, delete, view, and update the cashier. Similarly, the cashier can perform his actions such as adding, deleting updating, and viewing items, etc.

- Full Application: https://github.com/Mujtaba4li/GS-management-system-DESKTOP-APP
